NEW EDITION OF MOYS

Moys Classification and Thesaurus for Legal Materials, 4th edn

By **Elizabeth Moys** and others

Bowker, 2001

A\$289.00

The 4th edition of Moys was published in April 2001 by Bowker. Users will welcome the inclusion of the much-requested introductory essay from the first edition, 'Principles of Library Classification for Law Books' and Part 2, "Principal Features of the New Scheme" by Elizabeth Moys. As the local editorial coordinator for the 4th edition I had many submissions from law librarians regarding proposed changes to be included in the new Moys. Alan Edwards in particular from the University of Otago Law Library deserves special thanks for his thorough overhaul of every chapter of the Classification which produced many recommendations for change. Some changes were accepted, some were not, but be assured that all were given consideration.

Cataloguers will be pleased to have an updated edition with numbers assigned for a range of new terms such as 'Electronic commerce'. The term 'Trade practices' has not been included in the schedules however classifiers will find it

added to the thesaurus for the benefit of Australian users.

For further information on Moys, remember that there is always the *lis-moys-users* list where you can post your suggestions, ask for assistance in classifying and comment on aspects of Moys at anytime.
