Can you help?

We represent a client who at the age of fifteen was injured when she fell from a set of parallel bars while being instructed by a qualified instructor at a Police Boys Club.

Our client was being trained for a new routine and she was unfamiliar with the routine. She fell away from the top bar and there were no "crash mats" in the area which she fell and she subsequently had an L5-S1 fusion of the lumbar spine.

If any members can recommend an acknowledged expert in the field of gymnastics who has experience in negligence claims, please contact:

We are looking for an expert who may be able to assist us in investigating a diving fatality.

We require an expert in naval medicine/cardiology. While we would preferably like to interview a specialist from Western Australia, we would be pleased to interview experts from other states as well.

If any member is able to assist please contact:
