

user to paragraph 4.1.1 for the meaning of ‘constructive authority’. The label was not familiar, and I was eager to learn more. When I located the correct paragraph the author, rather disappointingly, states that ‘constructive authority’ is more commonly known as ‘ostensible’ or ‘apparent authority’, and he also groups agency by ratification under this so-called authority. The wisdom of introducing yet another label for a well understood concept escapes me, particularly when the author otherwise continues to use the common labels.

The author deals with the subject of agents as fiduciaries in, rather confusingly, two separate places. Firstly under the heading of ‘The points of similarity between bailment and agency’, and then in the chapter headed ‘Duties of the agent to the principal’. The subject of the existence and scope of the fiduciary duties is covered too briefly.

Further, the book deals too briefly with Crown agents and the subject the principal’s vicarious liability for the action of its agent. As McHugh J recently commented, vicarious liability is an important area of the law, which is evolving under circumstances where the contracting out of work has become commonplace. The High Court decision in *Travis Kane Scott v Geoffrey Arthur Davis* [2000] HCA 52 (5 October 2000) is an extremely good read for those who wish to explore the current thinking of the High Court on vicarious liability and the history and development of agency principles with respect to owners and drivers of motor vehicles.

On balance, this book fulfils its purpose to provide a book within ‘a moderate compass, avoiding the intricacies of detail that tend to obscure’. It is a useful addition to a practitioner’s library on the law of agency in Australia.

## Outline of Succession (2nd Edition)

By Ken Mackie and Mark Burton  
*Butterworths Australia 2000*

According to its preface, *Outline of Succession* is intended as an introduction to the law of succession aimed primarily at the undergraduate law student embarking upon the subject for the first time.

As its title suggests, *Outline of Succession* is not, and does not purport to be, an exhaustive analysis of succession law. It seeks rather to provide a general overview of the basic features of the legislation and case law in each of the Australian jurisdictions.

The book is wide in its scope, seeking to deal with the laws of succession in each of the Australian jurisdictions. As the authors themselves point out more than once in the book, the absence of uniformity across the Australian jurisdictions renders it impossible in a

work of this size to canvass in any detail the legislative provisions and case law of each of the states. The reader is frequently advised to consider for him or herself the specific legislation of interest or to refer to other texts in the area. Such an approach is unlikely to find favour with students who, due to limited time and resources, would be inclined to prefer a text which could be used as a ‘stand alone’ reference. Without consulting the legislation itself or the various other texts referred to, it is unlikely that a student reading this book alone would be capable of answering the questions which appear at the end of each chapter.

Whilst the authors generally do identify the key cases in each area, there is on the whole scant reference to Australian authority, with most references being to English decisions. Peculiarly, where the legislation of each of the Australian jurisdictions resembles the United Kingdom *Wills Act 1837*, the provisions of that Act are cited in preference to those of any of the Australian jurisdictions.

Whilst the book is written in a readily understandable style, there is excessive use of somewhat simplistic ‘Samuel is the owner of a property called ‘Redacre’ type illustrations. Explanation by reference to the facts of reported cases may have been more instructive.

For practitioners, *Outline of Succession* provides at best a starting point for research. It must be said that the book does not profess to be of more than occasional use to practitioners. This is particularly the case for practitioners in New South Wales, as many of the more difficult and commonly encountered areas of the law of succession in this state are glossed over in the book. For example, in Chapter 9 ‘Distribution on Intestacy’, only passing reference is made to s61D of the *Wills Probate and Administration Act 1898*, pursuant to which a surviving spouse has a right to acquire the appropriation of the matrimonial home.

The discussion in Chapter 10 ‘Family Provision’, in relation to the matters to be considered by the court in the exercise of its discretion as to what provision, if any, ought to be made in favour of an applicant is of such brevity and superficiality that it would offer no real assistance to a practitioner considering whether such an application would be likely to succeed. The complicated provisions in Division 2 of Part II of the *Family Provision Act 1982* relating to notional estate are given only cursory attention. Typically of the book as a whole, the chapter offers little in the way of guidance as to procedural matters.

In summary, *Outline of Succession* is unlikely to be of great assistance to practitioners. It may, however, provide a useful overview of the laws of succession for students.
