## DECISION-MAKING IN NATIVE TITLE

Working closely with community partners, this project involves community and family engagement and research to produce clear and accessible information on decision-making structures and processes to assist Aboriginal and Torres Strait Islander corporations in their governance policies and procedures.

## PBC CAPABILITY PROJECT

The Prescribed Bodies Corporate (PBC) Capability Project is a collation and analysis publicly available and organisational data about the current size, function, operational and economic capacity of PBCs and RNTBCs around Australia and the Torres Strait Islands to develop a long-term picture of the patterns, trends and changes across the PBC sector to better inform native title organisations and provide policy advice.

## MANAGING INFORMATION IN NATIVE TITLE (MINT)

The MINT project investigates the challenges of culturally appropriate management, storage, use and return of native title materials. The project team are currently drafting national guidelines and exploring options for a case study with a NNTRB/NTSP and PBC.

Is your organisation in the process of or thinking about handing back native title materials to community?

If so, please contact:

## NATIVE TITLE PRECEDENTS DATABASE

The major output of the Native Title Representative Bodies Knowledge Management Project is the Native Title Precedents Database. It is Australia's only national database for Native Title Representative Bodies and Native Title Service Providers (NTRB/NTSPs). Its secure environment allows each organisation to share agreements, legal advices, court documents and other resources confidentially.

If you would like to know more about the database, please contact:
