9th Special, Health & Law Librarians conference, Melbourne, 26–29 August 2001

... from previous page

Phil Ruthven, founder and executive chairman of IBIS, Australia's best-known business information, forecasting and strategic services corporation, will give the opening address to conference delegates on Sunday, 26 August 2001.

Rivers of Knowledge
9th Special, Health & Law Librarians Conference

be held at the Melbourne Aquarium 5.30–8.00pm.

Pre- and post-conference workshops

The Conference committee invites any group to submit details of proposed user groups/workshops/meetings to be held either side of the conference. This information can then be included in the conference registration brochure.

As this will be the largest meeting of the Special, Health and Law sectors in Australia, it is a great opportunity to capture these groups with your activity.

Submit your details, by the end of March, to Anne Docherty at The Meeting Planners, 91–97 Islington Street, Collingwood 3066 or adocherty@meetingplanners.com.au.

Misleading copyright claim

Attorney-General criticises copyright agency

Attorney-General, the Hon. Daryl Williams AM QC MP, has criticised the annual report of the Copyright Agency Limited (CAL) for making misleading claims.

The report, tabled in Parliament last month, states that the *Copyright Amendment (Digital Agenda) Act 2000* allows public and corporate libraries to sell an article or chapter online to an individual for research or study purposes, without paying a royalty, and that this allows a library to make a financial return.

The Digital Agenda Act, which will commence on 4 March 2001, extends the exceptions that currently allow users reasonable access to printed copyright material to the electronic reproduction and communication of portions of works and articles.

Users may currently request a copy of an article or a portion of a work for the pur-

poses of research or study. The Digital Agenda Act will simply allow a library to fulfil that request using new technologies such as e-mail. Any charge for such a user request may cover only the library's costs. According to the Attorney-General, if any library attempted to make a profit, as suggested by CAL, it would lose the benefit of the exceptions in the *Copyright Act*, and may be liable for copyright infringement.

CAL represents the creators of copyright material — authors, journalists, visual artists, photographers and publishers — as their non-exclusive agent to license the copying of their works to the general community. CAL has been declared by the Commonwealth Government as the collecting society to administer the statutory licence under Part VB of the *Copyright Act 1968*, for the copying of copyright material by educational institutions and certain institutions assisting readers with disabilities.

Internet tips and tricks #1

Make your web browsing happen faster with multiple windows. Many users of web browser software are unaware that, by opening new windows when following links, pages can download as you switch back and forth between them.

Whilst hovering over a hyperlink, control-click (Mac) or use the right mouse button (Windows) and choose 'Open in new window'. Get your page loading in a new window, and switch back to the original for further activity. The background window(s) will keep loading whilst viewing the foreground window. But be warned — MS Internet Explorer progressively runs out of steam as more windows open (Netscape Communicator and others do not suffer quite so badly with multiple windows).
