2000 No 120

# Threatened Species Conservation Act 1995 No 101

## Notice of Final Determination and Amendment of Schedule 3 to Act

The Scientific Committee established under the *Threatened Species Conservation Act 1995* has, in pursuance of Division 3 of Part 2 of that Act, made a final determination to insert the following matter in Schedule 3 to that Act (Key threatening processes) and, accordingly, that Schedule is amended as set out in Annexure "A" to this Notice:

High frequency fire resulting in the disruption of life cycle processes in plants and animals and loss of vegetation structure and composition

The final determination to insert this matter in Schedule 3 has been made because the Scientific Committee is of the opinion that high frequency fire resulting in the disruption of life cycle processes in plants and animals and loss of vegetation structure and composition adversely affects two or more threatened species or ecological communities and it could cause species that are not threatened to become threatened.

Copies of the final determination may be inspected at: The Information Centre (Level 1) National Parks & Wildlife Service 43 Bridge Street Hurstville NSW 2220

and at all District Offices of the National Parks and Wildlife Service during business hours.

#### 2000 No 120

Threatened Species Conservation Act 1995 No 101-Final Determination

Signed at Sydney, this 7th day of March 2000.

### Dr CHRIS DICKMAN,

Chairperson, Scientific Committee

## Annexure "A"

**Schedule 3** to the *Threatened Species Conservation Act 1995* is amended by inserting in alphabetical order the matter:

High frequency fire resulting in the disruption of life cycle processes in plants and animals and loss of vegetation structure and composition
